EDUCATION

University of Alberta

Bachelor of Science in Computer Science

June 2026

Edmonton, AB, CA

EXPERIENCE

Software Engineer Intern

Jan 2024 – Aug 2024

Formidable Designs

St. Albert, AB, CA

- **Enabled 250,000+ active devices** to sync seamlessly for 1,000+ users by designing MySQL database schemas and developing scalable APIs in Java and Spring Boot
- **Delivered 15+ RESTful API endpoints** for pattern customization with response times under 100ms by writing efficient Java with Spring Data JPA and Hibernate in MySQL
- **Eliminated a critical privilege-escalation vulnerability** by engineering server-side role-based access control (RBAC) with hierarchical permission tiers using Spring Security in Java, enforcing secure authorization
- **Optimized system performance and scalability** by refactoring a monolithic automotive financing service into decoupled microservices in Java, reducing average object coupling from 14 to 4
- **Streamlined cloud deployment workflows** and eliminated manual server configuration by utilizing GitHub Actions to build CI/CD pipelines that deploy Docker containerized applications directly to AWS
- **Accelerated feature delivery by 30%** by utilizing AI copilots to automate boilerplate Java code generation
- Leveraged knowledge in MySQL, Java, Spring Boot, Spring Data JPA, Docker, AWS, and AI copilots

Software Engineer Intern

May 2023 – Dec 2023

Formidable Designs

St. Albert, AB, CA

- **Reduced user data-entry errors by 70%** by replacing legacy digital contracts and forms with a dynamic, multi-step frontend using React, TypeScript, HTML, and CSS
- **Engineered end-to-end product features across 20+ responsive web screens** by consuming REST APIs and implementing modular React components in an Agile development environment
- **Accelerated team velocity by 20%** by maintaining a library of **40+ modular React UI components** in collaboration with design and product
- **Achieved 86% code coverage** across critical Java API paths by writing comprehensive unit and integration tests, ensuring zero major regressions during bi-weekly production releases
- **Consistently delivered committed sprint work** on time across 8 consecutive sprints by participating in standups, backlog grooming, and planning using Azure DevOps within an engineering team
- Leveraged knowledge in React, TypeScript, HTML, CSS, and Azure DevOps

LEADERSHIP EXPERIENCE

President

Sep 2025 – May 2026

University of Alberta Friends Across Campus Club

Edmonton, AB, CA

Teaching Assistant

Sep 2022 – May 2026

University of Alberta Department of Computer Science

Edmonton, AB, CA

PROJECTS

Baby Product Management App | *Java, TypeScript, Python, React, Next.js, Spring Boot, PostgreSQL, Docker*

- Engineered the backend service to track household inventory and aggregate external store data by building robust APIs using Java and Spring Boot for a Next.js frontend

Distributed Social Network App | *JavaScript, Python, React, Django, PostgreSQL, Heroku*

- Designed a decentralized social platform in Django and React, enabling cross-node messaging and content sharing

AI Reinforcement Learning Agent | *Python*

- Developed a self-reflective reinforcement learning algorithm, achieving 90% faster convergence than Q-learning

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, HTML, CSS, Python, SQL/NoSQL, Bash

Frameworks & Tools: Spring Boot, Spring Security, Spring Data JPA, MySQL, PostgreSQL, React, Next.js, Git, GitHub, GitHub Actions, GitHub Copilot, Azure DevOps, Docker, AWS
